

Let Argosy treat you to a cool getaway—The Mall, a favorite restaurant or a vacation destination.

Purchase any of our high quality programmable hearing instruments and receive an American Express Gift Cheque. For every programmable **CIC** hearing instrument purchased you'll earn a **\$100 gift cheque**. Purchase any **non-CIC programmable** hearing instrument and earn a **\$50 gift cheque**. American Express Gift Cheques are accepted wherever American Express is welcome. These gift cheques do not expire, so use them at your convenience.

Our programmable instruments are so easy to use! It takes less than 30 minutes to learn. Software is available as NOAH compatible or stand alone!

QuadraSound™— Offers four distinct sound processing systems in each hearing instrument. *Available in all models—including CIC's!*

- Linear Class D
- Manhattan II Adaptive High Pass Filtering
- WDRC With Adjustable Compression Ratio
- ICL Input Compression Limiting With Adjustable Compression Threshold.

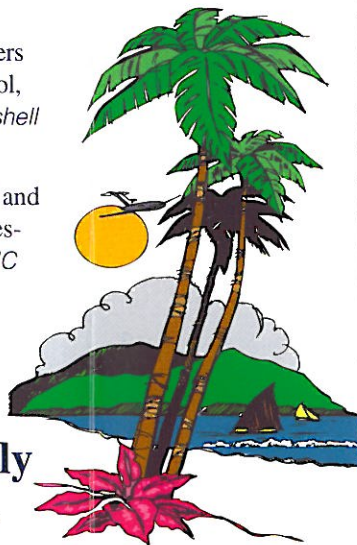

TRIAD™—Three uniquely flexible, independently adjustable channels! Triad offers two distinct processing options—linear and BILL, with independent gain adjustment in each band, mid-band frequency adjustment, overall gain and ASP attenuation. *Available in canal through full shell models.*

OnQue™—Tremendous two-channel processing flexibility! OnQue offers compression ratio controls in each channel, compression threshold control, crossover frequency and gain adjustments. *Available in CIC through full shell models.*

K-AMP®—Two processing options are available—traditional K-AMP and WDRC. K-AMP offers adjustments for compression threshold, compression ratio, loudness boost, low frequency tone and gain. *Available in CIC through full shell models.*
