Argosy Electronics, Inc.

Argosy Electronics, Inc. ranks among the nation's leading custom hearing instrument manufacturers in terms of both hearing instrument technology and reputation. Argosy has been solely dedicated to the design, development, and manufacture of custom hearing instruments since 1979.

TRIAD's three uniquely versatile, independently programmed channels provide amplification precisely where it's needed. Although TRIAD is technologically advanced, it is not appropriate for every person or every type of hearing loss. Your hearing health professional will be able to determine if it is right for you.

Hearing Loss!**

▼ **Versatile**

TRIAD hearing instruments can accurately address unique amplification needs. With six fine-tuning adjustment options, these instruments can be tuned to meet a variety of hearing requirements. Your hearing health professional individually adjusts the low, mid and high range sounds to specifically meet your unique hearing requirements.

▼ **Digitally Precise Programming**

TRIAD features the ease and speed of computer controlled programming to digitally match your instruments to you. These settings are programmed *in the office* by your hearing health professional. This provides quick and precise tuning to comfortably meet your hearing requirements. Once programmed, your instruments retain those settings in memory. Therefore, there are no adjustments to make once programming has been completed.

▼ **Convenient**

If your listening environment, life-style, or hearing loss change, TRIAD hearing instruments can be conveniently reprogrammed by your hearing health professional. You receive *in-the-office* adjustments to instantly address your changing needs! Consult with your hearing health professional today to determine if TRIAD hearing instruments are right for you.
