

Crowded rooms, car travel, busy offices – noisy surroundings can be frustrating. The noises around you can often drown out the sounds and voices that you most want to hear.

Until now.

With the Vector Directional and Omnidirectional Microphones, you can choose the best microphone for your listening environment. Both contained within one hearing instrument, the Directional Microphone can focus in on the area in front of you while the Omnidirectional Microphone takes in the sounds all around.

Don't accept hearing annoyances any longer. Talk to your hearing professional today about getting the Vector advantage—the simple solution to listening in noise!

Argosy Electronics, Inc. was established in 1979 and has grown to become one of the nation's leading manufacturers of in-the-ear hearing instruments. Argosy attributes its success to a company philosophy that emphasizes integrity and quality in products, service and technology.

Argosy's VECTOR is available through most of the more than 10,000 independent Hearing Health Professionals throughout the nation. The goal of Argosy and your Hearing Health Professional is to provide you the finest hearing assistance possible.

VECTOR

Directional/Omnidirectional Microphone

A Simple Solution for Listening in Noise

Argosy Electronics, Inc.
P.O. Box 59072
Minneapolis, MN 55459

Presented by Argosy Electronics

VECTOR Gives You The Power To Choose

Choose the **Directional Microphone** to amplify the sounds in front of you in noisy environments

Choose the **Omnidirectional Microphone** to amplify the sounds all around you in quiet environments

VECTOR Ease:

When your surroundings get noisy, simply push a button on the hearing aid to activate the **Directional Microphone**. This fully amplifies the sounds coming from the front while dramatically reducing the disruptive noises from the rear. When quiet conditions return, push the button once more to activate the **Omnidirectional Microphone**, and you'll again hear the sounds from all around you. Vector is also available with multiple-position buttons for telephone and extreme noise settings.

VECTOR Advantages:

- **Better hearing in multiple environments** - reduce the annoyance of background noise
- **An easy-to-locate, easy-to-use pushbutton to change microphones** - no remote control to lose and no guessing which mode you're in with our built-in, precision switch
- **Compatibility with more circuits than any other company** - VECTOR microphones can be combined with numerous sophisticated programmable and non-programmable electronic circuits. The result is a wide range of amplification designs to meet your individual needs
